This is a sample document format for the one page Conference Summary for submissions to CLEO Europe/IQEC 2007. It has been prepared in collaboration with the EPS Conference Office. Although this document is provided in Microsoft Word format, the paper to be uploaded must be in PDF format. Please note that the required paper size is A4. Please select margins as follows: left & right = 20 mm; top = 37 mm; bottom 19 mm. For text fonts: use only 10pt Times (roman, **bold** or *italic*), and Symbol. Sans Serif Fonts such as Arial can be used in Figures. Include all equations, drawings, figures and references within the one page limit. Avoid asterisks, acknowledgements, job descriptions or footnotes. Do not add page numbers.

Please be concise in your presentation, highlighting what is novel and original about your submission. Do not repeat the separate 35 word abstract. Simple equations should be included in-line wherever possible, whereas more complex expressions should be centred and numbered if there are several. Figures should be relevant to the submission and preferably centred as shown below. Placing subfigures side-by-side is a convenient way to include multiple results within the one page limit. Cite references at the end of the summary, with a maximum of two. A suggested format for references to avoid using excessive lines is given below.

Fig. 1 Figure captions should use 10 pt font as shown. Please ensure line-types are visible. Here we show the functions: (a) $y = \sin(x^2)$ and (b) $y = x$ (short dashes), $y = x^{3/2}$ (long dashes) and $y = x^2$ (solid line).

Following standard practice, we fill the rest of this template with placeholder text. For those interested in this kind of thing, the text is derived from Cicero's *De finibus bonorum et malorum* (About the Extremes of Goods and Evils, or alternatively [About] The Purposes of Good and Evil). If you want an English translation and further information, *Wikipedia* is a good first place to look.
